[GitHub](#) || [Linkedin](#) || [Portfolio](#)

Objective:

Full stack developer with over some month of experience building modern dynamic websites, applications and database for reputable brands. Excellent visual design and Error finding Skills. Demonstrated proficiency in both client and server-side architecture . In Future I want to work on JavaScript more as there are better growth opportunities.

Relevant Skills:

- **Expertise:** HTML5, CSS3, Bootstrap-5, Tailwind CSS, DaisyUI, JavaScript, ES6, React.
- **Comfortable:** React Query, React Hook Form, Firebase, Rest API, Express.js, MongoDB, JWT.
- **Familiar:** Node.js, Redax, Payment getaway, Material UI, TypeScript.
- **Tools:** VS Code, GitHub, Chrome Dev Tools, Figma, Heroku, Netlify, Firebase Hosting.
- **Interpersonal:** Leadership, Team Work, Communication, Negotiation, Flexibility.
- **Operating System:** Windows.

Project:-

1. [NeighbourHome](#) (Property management site) [Client](#) [Server](#)

❖ Features:

- Property Management Website (Team Project).
- An Property Manager can update their offer and control user commercial behavior, such as like approve the hiring, making admin, different roles and profiles, and subscribing features (getting a special discount for monthly or yearly).
- Authorization system, so every user must verify her email quickly. JWT token including for data security. For every role use this user information (Email: user99@gmail.com pass: 123456AB#).

❖ **Technology:** React, Mongoose, Tailwind, Firebase Authentication, Express, MongoDB, Heroku, React query.

2. [WaltonPc](#) (Manufacturing Company site) [Client](#) [Server](#)

❖ Features:

- WaltonPc is Manufacturing Pc Parts/Tools for Local Marketing .
- Verify user can order for her local company, and manage her products (quantity, delete items, adds etc) with good UX . Also add a new Feature where user can also add reviews about our services.
- Admin dashboard added for control this site management, Admin can add products, delete products, make another Admin. (Admin Email: user@gmail.com Pass: 123456)
- For the admin role, I implement JWT and Admin for verification.

❖ **Technology:** Axios, TailwindCSS, DaisyUI ,React, React Routing, , Express, MongoDB, Heroku, React hook form, React query, Login-SignUp.

3. [Evolve](#) (Single Service Provider site) [Client](#)

❖ Features:

- An Gym trainer who serves individuals in her organization.
- Data Store on JSON file (dynamically). A user can be booking his order after Login or Signup.
- When the user clicks “ Booking ”, Open a single id page that shows only this item's information.

❖ **Technology:** JSON, Firebase Authentication, React, React Routing, Bootstrap.
